REPORT
INTERNATIONAL WEBINAR ON
RECENT TRENDS IN WIRELESS COMMUNICATION

From 4/11/2020 To 6/11/2020

Time :11am-12pm

Organized by

DEPARTMENT OF PHYSICS, SREE AYYAPPA COLLEGE FOR WOMEN
CHUNKANKADAI

In collaboration with

INDIAN TEACHERS ASSOCIATION OF PHYSICS TEACHERS

PATRON :Dr K.V Jayashree principal, SAC

CONVENOR :Dr. I.S Prameelakumari, Head of the department and assistant professor of physics, SAC

ORGANISING SECRETARIES:Dr M.R Meera ,Assistant professor of physics, SAC

Prof. RG Ajitha, Associate professor of physics, SAC

INTRODUCTION :

The webinar was conducted for three days on topics covering Telecommunication in India, mobile and wireless communication and wireless and telecommunications.

DAY 1:

This session was taken over by **Dr. S jyothisankar. ITS Indian Telecommunication Service (retired), former principal General manager, kerala circle BSNL.** The topic covered was Telecommunications In India in which he discussed about evolution of telecommunications, various applications of telecommunications. India is a largest major consumer of wireless data globally. India ranks second in terms of number of telecommunication subscriptions, internet subscribers and app downloads . The telecommunication industry in India is rapidly growing and witnessing many developments. There would be always a finest niche market in India, which would catch up with the cutting age of the technology, consolidation and expansion of evolving technologies across the length and the breadth of the country will follow with a lag. It has gone through several transformations that has led to severe competition in the industry. This three days international webinar focuses on providing the opportunity for anyone interested in knowing what to expect in future wireless communication networks, without much prior knowledge

DAY 2:

This session was taken up by **Prof. Pratik Twade Electronics and Telecommunication department, vidyalankar polytechnic, wadala, Mumbai.** He discussed on the topic mobile and wireless communication under which he explained all the generations of communications and their features. Wireless Communication has a long history of its development, a means for exchanging information through the free space or wireless media. Though in the beginning it was developed as a tool to cater mobile telephony but due to increase of user density and requirements of faster access of information in terms of data, video, voice etc. from remote location in mobile fashion requires new emerging trends of wireless technology. Mobile and wireless telephony has tremendously changed the

Chikkankotada

way in which accessing of corporate information can be done at very faster rate from any remote location at any time by employees, partners and customers, changing the way in which corporate do business since the new millennium.

DAY 3:

The final session was taken over by **Dr. NJ suthankissinger assistant professor in physics /physics course director, department of General studies, Jubail University college, Royal Commission for Jubail, Saudi Arabia.** Over the past few years the landscape of the information and telecommunication industry has been subject to dramatic changes. The enormous growth of the Internet and the advances in both wired and wireless network technologies have boosted the emergence of advanced multimedia applications offered over distributed systems consisting of a heterogeneity of network technologies and information servers. On the business side, the market share of e-business is increasing, the Telco market is becoming more competitive and the unbundling of the telecommunications world has become reality. These developments raise a number of new challenges for performance analysts. In this context, this three day international webinar on recent emerging trends in wireless communication providing the opportunity to know about wireless communication networks, without much prior knowledge. He gave an idea on the topic wireless and telecommunications and gave detailed information about early cellular system, zigbee etc.

CONCLUSION : A Total of 209 participants participated in the webinar. All the three sessions were very informative and also had an interactive question answer session at the end of each session.
